### ALL ABOUT U

From uPlay comes the uPro, a handheld, electronic distance-measuring device for golf. The uPro (\$399.99) combines the technology of GPS and laser range capabilities to provide high-resolution aerial photography and satellite imagery for thousands of U.S. courses. The 2.2-inch color screen displays hazards and multiple fairway viewpoints, and accurately generates distance markers. The purchase price includes one free ProMode download of any golf course.
